PROFESSIONAL SUMMARY

Data Analyst (B.Tech CSE, 2026) skilled in Python, SQL, and Power BI, turning raw data into clear, actionable insights. Built end-to-end ML and analytics projects spanning marketing prediction, real estate pricing, and trend analysis. Combines strong technical depth with clean data storytelling to drive smarter business decisions.

TECHNICAL SKILLS

Programming & Query: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL (Joins, Grouping, Subqueries, Window Functions)

Data Visualization: Power BI, Microsoft Excel (Pivot Tables, VLOOKUP, Power Query), Google Sheets

Data Skills: EDA, KPI Development, Trend Analysis, Data Cleaning, Data Wrangling, Reporting, Data Storytelling

Machine Learning: Predictive Modeling, Regression, Classification, Feature Engineering (Scikit-learn)

Databases: SQL, MongoDB

Tools & Platforms: Jupyter Notebook, Git, GitHub, MS Excel, PowerPoint, VS Code

Professional Skills: Problem-Solving, Stakeholder Communication, Insight Presentation

EXPERIENCE

Python Developer Intern | Edslash Services

Aug 2024 – Oct 2024

- Developed Python-based applications and performed data analysis using Python, Pandas, NumPy, Matplotlib, and Seaborn to build practical solutions and derive insights from real-world datasets.
- Built a User Authentication System and conducted Exploratory Data Analysis (EDA) on engineering colleges and job market datasets, including data cleaning, visualization, and reporting.

PROJECTS

Marketing Predictor Using Machine Learning | Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Power BI, SQL

- Developed a predictive ML model to forecast marketing campaign success by analyzing customer demographics, purchase history, and behavioral data.
- Engineered features and applied classification/regression algorithms to identify the key drivers of campaign performance.
- Built Power BI dashboards to visualize model outputs and campaign KPIs for data-driven marketing decisions.

Real Estate Market Analysis & Price Prediction | Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Conducted end-to-end exploratory data analysis on real estate data to uncover pricing trends and patterns.
- Built and tuned machine learning regression models to predict property prices with high accuracy.
- Identified the top price-driving factors, delivering insights that support data-informed property valuation.

Exploratory Data Analysis (EDA) Projects | Python, Pandas, NumPy, Matplotlib, Seaborn

- Performed data cleaning, wrangling, and exploratory analysis across five diverse datasets, including Jobs in India, Engineering Colleges, Zomato, Swiggy, and Property Prices.
- Extracted actionable insights on market trends, salary patterns, and consumer behavior using statistical analysis and visualization.

EDUCATION

Amity University Madhya Pradesh

2022 – 2026

Bachelor of Technology – Computer Science Engineering | CGPA: 7.91/10 (till 7th Semester)

Shri Datta Vidya Mandir, Nagpur

2021 – 2022

12th – PCM

CERTIFICATIONS & TRAINING

- Google Data Analytics Professional Certificate – Coursera
- Python for Data Science & AI – IBM
- SQL: A Practical Introduction for Querying Databases – IBM
- Python Developer Internship Training – Edslash Services

ACHIEVEMENTS & ACTIVITIES

- Built Power BI dashboards with KPIs and visual analytics that improved data exploration for non-technical stakeholders.
- Participated in multiple hackathons, delivering data-driven insights under time constraints.
- Completed a 45-day coding and analytics challenge; engaged in public speaking to strengthen data storytelling skills.
